ABOUT ME

Junior web developer specialised in PHP, Laravel, Angular and MySQL. With my artistic background and American-Belgian roots I combine technical insight with creativity. I run a Proxmox homelab with Linux containers, Docker and self-hosted services to sharpen my DevOps skills.

PROJECTS & HOMELAB

Personal website — sage-stockmans.com

Portfolio introducing my background, featured projects and contact details. Built as a clean, fast landing page.

GitHub portfolio — github.com/TheAbyssSage

Active profile with personal projects and experiments around Laravel, Angular, AI tooling and DevOps workflows.

Proxmox homelab

Self-hosted lab running Linux containers, virtual machines, networking and self-hosted services; used to test deployment pipelines, Docker stacks and production-like setups.

Hermes — AI agent

Personal agent that orchestrates tasks, controls tools and automates repetitive workflows, pragmatically integrated into Laravel/Angular stacks.
